

Euteltracs

*EutelTRACS™ mobile communications system for FLEET MANAGEMENT SOLUTIONS
Qualcomm Technology*

For large companies, bigger fleets and industrialized transportation business a satellite-based Fleet Management System like EutelTRACS is the most efficient and secure way to handle the daily business, especially when travelling to international destinations. The reliability and transparency of a secured closed network dedicated for Transport Operations is for professional usage indispensable.

Effective management by exception requires guaranteed data transmissions.

The EutelTRACS/Qualcomm satellite based network technology has proven it's functionality over and over again.

It is the most successful Fleet Management System in the world with a history of more then 15 years of experience.
