MENTORE EVENT

Galileo & EGNOS for public interest services

CONFERENCE OUTLINE 1.0

25 November 2008

Sofitel Le Louise - Avenue de la Toison D'Or, 40
1000 Brussels - (Belgium)

1. Introduction

MENTORE (iMplemEntation of GNSS tracking & tracing Technologies FOR Eu regulated domains) is a two-year project co-financed by the European GNSS Supervisory Authority (GSA). It will help to understand how EGNOS today and GALILEO tomorrow will support track and trace sensitive assets in a regulated environment, and facilitate the identification of missing regulations at European level.

The MENTORE project will host its first event "Galileo & EGNOS for public interest services", in Brussels on 25 November 2008.

Following the conclusion of the testing period which foresees the implementation of five promising pilot applications (Tracking and Tracing Services for Fissile and Radioactive/Nuclear Transport, Tracking

and Tracing Services for Livestock Management, Tracking and Tracing Services for Dependent Persons, Tracking and Tracing Services for Authorised Economic Operator (AEO)/e-custom and Tracking and Tracing Services for City Logistics), the MENTORE event will draw the attention on existing business opportunities where EGNOS and Galileo are key assets.

The first MENTORE event will offer the audience a large overview of the institutional and regulatory scenario regarding GNSS. It will also provide a unique opportunity to discuss burning issues (privacy in regulated services, liability and Service Level Agreement, users' viewpoint, etc.) with high-level experts belonging to the MENTORE Applications & Regulatory Observatory.

2. Preliminary Programme

Tuesday - 25 November 2008
